

Case Study

Recycling

"Tarmac and KKB have a true partnership, KKB provide Asphalt processing and recycle construction and demolition waste for Tarmac at 25 sites across the South. This provides flexibility for Tarmac and a consistent work load for KKB. Through collaboration KKB minimises transport costs whilst Tarmac ensure a quality product is available at all sites on demand. KKB provide advice and support and deliver innovative low cost solutions on request. I am extremely happy with how the relationship has developed it is working well for both parties."

Kevin Short – Industrial Footprint Manager – Tarmac Ltd

KKB Group specialise in recovering and recycling construction and civil engineering waste.

We have extensive experience of operating large recycling contracts for Blue Chip Clients. Our teams work with our Clients in a totally integrated manner to provide a range of high quality recycling solutions and products. We apply innovative techniques and technologies to maximize the value of waste material and increase the efficiency and sustainability of construction projects.

Our ongoing inward investment strategy ensures we use the latest, most fuel efficient, plant and equipment to process a wide range of waste materials to exact Client specifications. We implement the WRAP Quality Protocols to prepare certificated recycled aggregate and recycled asphalt products. We also supply specialist equipment and labour to segregate and remove other building products such as glass, timber and metals to local recycling centres.
