

Environmental Policy

We recognise that our activities have both a local and global impact on the environment. These impacts can be in our immediate vicinity or more widely through the consumption of energy and emissions to air, land and water. To minimise these environmental impacts as much as reasonably achievable, we realise that environmental protection, prevention of pollution, energy efficiency and sustainability is essential to business operations and fundamentally the right, ethical and responsible thing to do.

This policy provides the framework for setting and reviewing environmental objectives and targets designed to deliver continual improvement in environmental performance.

The organisation fully commits to:

- Taking reasonable steps to protect the environment.
- Create and review annual carbon reduction plan with aim to be carbon neutral by 2050.
- Identify and achieve Environmental Objectives.
- Determine compliance obligations and ensure operations are completed in accordance with them.
- Continually improve the environmental management system to enhance environmental performance.
- Implement and maintain an environmental management system that is in compliance with ISO 14001.
- Allocate suitable and sufficient resources which enable the organisation to achieve its environmental aims and objectives.
- Prevent pollution, reduce waste and ensure that, wherever practical, measures are implemented to protect and preserve natural habitats, flora and fauna.
- Consider the effects that our operations may have on the local community.
- Take action to eliminate or reduce, as far as practicable, any potentially adverse environmental impacts.
- Promote environmental awareness amongst our suppliers, contractors and partners by the implementation of operational procedures.
- Complete internal audits and following a path of continuous improvement.
- Ensure that directors and management are fully engaged in the management of environmental issues.
- Seek to work in partnership with the community by behaving in a considerate and socially responsible manner.
- Ensure effective and expedient incident control, investigation and reporting.
- Assess and, where practicable to do so, reduce the environmental impact of the organisation's products and services.

Directors, management and supervisory staff have responsibilities for the implementation of the policy and must ensure that environmental issues are given adequate consideration in the planning and day-to-day supervision of all work.

All employees and subcontractors are expected to co-operate and assist in the implementation of this policy, whilst ensuring that their own work, so far as reasonably practicable, is carried out without risk to themselves, others or the environment. This includes co-operating with management on any environment-related matter.
