

KKB Group's Plant Hire Division supplies over 250 items of specialist plant and machinery to the construction and civils sectors. From our main depot in Rochester, Kent we can provide a responsive, on-demand range of machinery, equipment and operatives to facilitate and streamline the delivery of the regeneration and infrastructure developments. Hire can be provided with or without operatives.

To preserve our reputation for providing excellent service, we work hard to stay abreast of current and

PLANT WE SUPPLY

- Bulldozers
- Dump Trucks
- Crushers
- Excavators
- Loading Shovels
- Picking Stations/Tracked conveyors
- Screeners
- Stabilisation facilities

future technology and our in-house maintenance team ensure that items are fully serviced to ensure compliance with legal standards.

We continuously upgrade our plant and fleet with the latest innovations and safety enhancements including IMC (intelligent machine control), anti-collision, 360 vision, product utilisation technology, traffic light systems, anti-tip and seatbelt warning alarms.

KKB Group leads the way in delivering fuel-efficient hybrid plant. Our hybrid excavators reduce fuel consumption and carbon emissions by 20% and 15% respectively. Our fleet also includes diesel-electric impact & jaw crushers. All of our plant are able to operate using hydrotreated vegetable oil (HVO) which is 100% renewable, biodegradable, non-toxic and can reduce CO₂ emissions by as much as 90%.

KKB is a corporate member of the Construction Plant Association (CPA) and all our plant hire operations are carried out in compliance with our integrated health, safety, quality and environmental management system which is certificated against ISO 9001, ISO 14001 and ISO 45001.
